

CQG Integrated Client System Specifications

July 2010 | Maximize your CQG experience

With a high-speed market data feed that offers reliable data from over a hundred global sources, the industry's most sophisticated analysis tools, and low-latency order routing to over thirty-five electronic exchanges, CQG Integrated Client is the premier software package for professional traders and market analysts. To help you maximize your CQG experience, we provide both required and recommended system specifications.

Specifications

	Required	Recommended
Operating System	Windows® 7, Windows Vista, or Windows XP.	64-bit Windows 7.
Processor	Dual-Core. Intel® Core™2 Duo (2.33 Ghz or better).	Intel Core i5 or i7.
Memory	4GB RAM.	6GB DDR2 SDRAM or more for Vista or Windows 7.
Hard Drive	160GB, IDE-100, 7200RPM with 4GB of free hard disk space.	320GB Performance RAID 0 (2 x 160GB WD Raptor SATA 1.5GB/s 10,000 RPM HDDs) with 6GB-10GB of free hard drive space. 30%-40% of free disk space is advisable for overall system performance. SCSI encouraged.
Video Card	Dual port graphics adapter with 128Mb of memory, 64Mb per port.	256Mb recommended with 128Mb per port supporting DirectX version 9.x.

System Setting Requirements

Hibernate and stand by modes cannot be used on a system running CQG IC. Hard drive power-saving features should also be disabled. Windows 2000 is not supported.

Internet Access

CQG Integrated Client requires Internet service via a high-speed connection, such as DSL, cable, or fixed wireless/wireless local loop (WLL). Wireless Internet connections are not recommended, especially broadband over a WiFi card. Dial-up is not supported.

Monitor Setups

These specifications are appropriate for single and dual monitor setups. If you have three or four monitors, you will need a higher performance processor, video card, and network connection.
