

Advanced Software. Engineered for Speed.

CQG for US Treasuries

Hosted Direct Market Access to all major US Treasury cash and futures markets with server-side speed for spreading and aggregation.

Complete exchange access

Spreading and aggregation

Trade based on price, yield, or net change

Premier Integrated Solution

Create and manage sophisticated spread and aggregation orders between all cash and futures exchanges.

Comprehensive Access

CQG provides market data and trade execution for all US Treasury-related markets. CQG provides hosted Direct Market Access to BGC, BrokerTec, CME Group, ELX Futures, GovEx, and NYSE Liffe U.S.

Powerful Aggregation

CQG has added server-side aggregation to its Hosted Exchange Gateways. This enables you to automatically trade similar instruments on two or more exchanges with CQG's server-side order routing gateways. You manage where the trades get filled based on your preferences. These tools are extremely powerful when used with CQG Spreader. Unlike other vendors, CQG allows you to execute a basis spread where each leg of the spread is an aggregation of two or more markets.

Server-Side Advantage

CQG's trading solutions are easier to deploy, require less capital investment, are less expensive to maintain, and deliver market-leading performance and reliability. CQG-operated market data and exchange networks reduce your overhead. CQG's risk engine gives you maximum control over customer accounts. Ease and speed of implementation and dedicated CQG support increase your operational efficiency.

Flexible Trading

Treasury traders can display and trade the markets based on price, yield, or net change. CQG gives traders the complete flexibility to configure their trading workspaces to meet unique trading requirements.

Spreader at a Glance

- Set up spreads with up to forty legs, and actively quote up to ten legs.
- Configure leg ratios, scale, order management, and legging risk.
- Prioritize leg placement.
- Easily identify spreads and their legs with DOMTrader® and order color-coding.
- Manage cross-account spread trading.
- Set up monitored leg orders using bid and ask queue volume conditions.
- Manage risk with overfill management.
- Trade ratio spreads with proportional execution.
- Manage placement with queue holders.
- Trade off net change prices or yield.
- Manage incomplete orders with a pay-up limit or with CQG's smart trailing limit orders.
- Use Sniper Mode for near-instantaneous execution and to reduce message counts.
- Use QFormulas to simplify complex strategies.
- Access CQG's full suite of charting and analytics tools.
- Incorporate computer-readable news events into your spread trading strategies.
- Monitor and manage spread activity with Spread Matrix and Spread Pyramid.

Aggregation at a Glance

- Use QFormula expressions.
- Specify how orders are sent using Market Taking or Market Making mode.
- Control preferred distribution between exchanges.
- Specify how partial fills are handled.
- Manage the risk of overfills.
- Set working thresholds.

CQG: Everything Your Traders Need

Quality, Innovation, and Superior Service

Consolidated Market Data

CQG delivers a high-speed consolidated market data feed covering multiple asset classes. Dedicated teams in five locations across the globe actively maintain real-time and historical data quality. We handle ever-increasing market data volumes, so you don't have to.

Decision-Making Tools

Powerful, flexible, and easy to use, CQG charts and studies combine with the best real-time and historical market data in the business to provide traders with critical insight into market activity.

Server-Side Tools

Spread orders, orders into aggregated markets, and smart iceberg orders are managed on CQG servers collocated with exchange-matching engines.

Electronic Trade Routing

Today's traders need reliable, high-speed access to electronic markets. The CQG Hosted Exchange Gateways provide our customers with low-latency connections to major cash and futures exchanges.

Risk Management

CQG's risk management module enables FCMs to perform pre-trade and post-trade risk evaluation using CQG's industry-leading proprietary margining system.

Enterprise Data Solutions

CQG software combines the world's most sophisticated analysis tools with our high-performance market data feed to enable your decision making and execution.
