

CQG TradeFlow™

Reinventing the chart. Again.

TradeFlow charts show electronic market aggression by graphically displaying volume hitting the bid or lifting the offer.

- Only available from CQG
- The latest breakthrough in charting
- Applies to any trading system or style
- Aggregation for TradeFlow bars
- Tracks the inside market
- Gauges volume of executed trades
- Visibility of who's dominating price movement
- Utilize on all electronically traded futures markets

TradeFlow Charts & Studies

TradeFlow Chart with Studies - Apply any of CQG's studies to a TradeFlow chart. Execute orders right from the chart using CQG's SnapTrader and Order Book.

TradeFlow Volume™ - Break volume down into trades executed at the ask price (buying) and the bid price (selling).

TradeFlow On-Balance Volume™ - Track the net buying versus selling activity. See the dominant trend.

TradeFlow charts detail trader action at the bid and ask price. *Patent Pending*

TradeFlow Aggregation

Aggregated TradeFlow bars allow traders to set the high-low bar ranges to suit their trading style. **Patent Pending**

Aggregated TradeFlow

- Choose from one to twenty ticks, (high-low range), for the TradeFlow bar.
- Use the same color-coding as TradeFlow bars.
- Compress the individual TradeFlow bars into a single bar based on range.
- Show whether buyers or sellers are dominating the market.
- Apply TradeFlow studies to the aggregated TradeFlow bars.

TradeFlow Smoothing

Smoothed TradeFlow bars emphasize the trend. **Patent Pending**

Smoothed TradeFlow

- Track trends, support, and resistance levels.
- Reduce market noise around the trendline to enhance the trend.
- Apply the TradeFlow technology with smoothing techniques to emphasize the trend.
- Use smoothed TradeFlow bars as an aid to spot key market turns.
- Available in CQG version 7.5.
