### Trade NYBOT Agricultural Futures

CQG customers can now trade NYBOT soft commodities directly through CQG's electronic order routing. Through CQG, traders have instant access to order execution and price discovery for these newly listed products.

As of January 12, 2007, NYBOT became a wholly-owned subsidiary of the IntercontinentalExchange (ICE). In late January, nearly around the clock, (22 hours), electronic trading was offered in the physical contracts for NYBOT agricultural products via the ICE electronic trading platform.

Contract specifications and commodity codes remain unchanged for both floor and electronically traded contracts. The open outcry and elec-

tronically traded contracts are fungible with one another. Traders will have two ways to trade the same contracts. Trades initiated in the pits can be liquidated on the electronic exchange and vice versa.

The open outcry session trading hours remain unchanged. The daily settlement price for both electronically traded and open outcry traded contracts will be the settlement price posted at the close of the contract's open outcry trading session.

*Trading and investment carry a high level of risk, and CQG, Inc. does not make any recommendations for buying or selling any financial instruments. We offer educational information on ways to use our sophisticated CQG trading tools, but it is up to our customers and other readers to make their own trading and investment decisions, or to consult with a registered investment advisor.*
