### **New CQG!**

CQG version 7.4 is now available to all of our customers! This exciting new CQG version contains many new features designed to give our traders an edge:

- TradeFlow™ Charts and Studies: An exclusive new way to see the inside market.
- CQG API: Our new API allows clients to export market data and import order flow.
- CQG News: A completely redesigned News interface with many user-friendly features including graduated font size to emphasize most recent headlines.

New features and enhancements have been added to order routing in version 7.4, including:

- Exchange-traded spreads
- SnapTrader, a new chart-based order entry tool
- DOMTrader with integrated TradeFlow charts
- Order-cancels-order (OCO) support
- Automated trailing stop orders
- Manual fills: Trades executed outside the CQG Gateway can be logged in your CQG positions
- Combined positions tracking

### **New Order Routing Connectivity**

- Intercontinental Exchange
- Sydney Futures Exchange
- Singapore Exchange
- NYMEX and COMEX products on Globex

### **Expanded market data coverage**

- ICAP/BrokerTec
- Australian Stock Exchange
- Korean Stock Exchange
- Hong Kong Futures Exchange

### **CQG Data Factory**

CQG has launched our new Data Factory product, an online service providing traders and researchers with decades of historical market data.

### **Coming in 2007**

- Continued expansion of the CQG order routing network.
- Another CQG exclusive! Smoothed TradeFlow reduces market noise around the trend.
- CQG Order Ticker shows order-by-order changes in market depth using a ticker tape display.
- Even more enhancements to CQG News, making it easier to sort, filter, and read stories.
- Order routing for electronically traded options using the CQG DOMTrader.
- Greek & theoretical values and implied volatility by price available in the DOM.
- And more!
