

Newedge and CQG Connect Traders to Asia

CQG has expanded our electronic trading network to include seven exchanges in the Asia/Pacific region supported by the Newedge Frontiers trading gateway.

Mutual CQG-Newedge customers can now route orders from their CQG screens to the exchanges listed below via the new connection between CQG trading gateways and Frontiers. Additionally, CQG clients benefit from highly efficient delivery of market data for these exchanges through the CQG ticker plant and server farms.

Interested traders should contact their Newedge account manager for details.
