

Need to Know News U.K. Component Pac Overview

Introducing U.K. economic release data that can be sorted into Enhanced Quote SpreadSheet displays.

CQG now offers Need to Know News U.K. economic release data that can be viewed in a quote display. The component pac, NTKN_UKVersion2.pac, sorts the data into columns using the Enhanced Quote SpreadSheet (EQSS) displays.

U.K. Economic Release Data:

- CBI surveys
- Consumers and mortgage activity
- Employment
- Gross domestic product
- Industrial production
- Prices and inflation
- Public sector finances
- Retail sales
- Trade balance

EQSS Columns:

- Actual (the economic-reported data)
- Actual versus Estimate (the difference between the actual and the estimate)
- Actual versus Previous (the difference between the actual and the previous or revised report)
- Estimate (data posted the day before)
- Latest (the most recent economic report data)
- Previous (the previous unrevised data that was reported)

When viewing the economic release data using the EQSS displays, always assume the decimal is placed two digits to the left. For example, if the estimate for the Producer Price Index percent change is 60, then the value is 0.60%. If the estimate is 120, then the value is 1.20%.
