

News in CQG Trader

Access market-moving events through our streamlined execution platform.

CQG's cutting-edge news interface allows traders to efficiently track key economic releases and to monitor trading decisions. With the CQG News interface, customers can view real-time headlines in a scrolling display and access breaking news, economic reports, and commentary. The interface also allows traders to highlight headlines and filter market releases based on their trading needs.

CQG News is displayed as a separate window in CQG Trader. Customers can easily customize, navigate, and monitor news activity in this powerful interface.
