

# Trading RTS with CQG

## Premier connectivity to the Russian markets.

CQG offers traders direct market access to the Russian Trading System (RTS). By using the fixed protocol, CQG offers low-latency access to FORTS, the derivatives market of the RTS. Customers

can trade all FORTS products, including indices futures and options, futures on shares, metals, and energy contracts. The RTS is one of more than thirty exchanges available for order routing with CQG.

Traders can access innovative trading tools and Dow Jones Forex and Interfax News services to efficiently trade on the RTS.

### Order Routing Features
