

Entry Signal Evaluator

Test entry setups on a portfolio of markets

Determine how effective long and short entry setups perform on a portfolio of markets using the Entry Signal Evaluator. This easy-to-use module will help traders and analysts take the guesswork out of their trading signals.

The Entry Signal Evaluator offers summary statistics and maximum open profits/losses bar-by-bar for each entry signal out to sixty bars.

Entry Signal Evaluator Benefits

- Easily create new test runs using the setup wizard.
- Test entry signals over one market or a portfolio of markets.
- Gauge profit/loss performance based on thirteen statistics.
- View performance details in tables or graphical displays.
- Export results to a Microsoft Excel® spreadsheet for further analysis.
- Test the validity of an entry setup before developing a full trading system.
- Utilize statistics to better manage your trades.
- Determine which entry signals work best in specific markets.
