

Entering Exchange-Traded Strategies in CQG

1 Identify the instrument's symbol

Please see our list of [exchange-traded strategies](#).

2 Identify the type of strategy

Bundle	B	An order for a group of contracts for the same commodity in each consecutive quarterly delivery month for a period of two or more years. The first month of a bundle is configurable and can be any month within the next twelve months, although it's usually the front quarter. The number of lots in each leg must be the same. LIFFE CONNECT and CME Globex currently recognize four Bundles: 2-Year Bundle/3-Year Bundle/4-Year Bundle/5-Year Bundle.
Butterfly Spread	L	Simultaneous buy/sell order for one contract in the near delivery month, sell/buy order for two contracts in a future delivery month, and buy/sell order for one contract with an even later expiration. The gaps between the months must be equal.
Calendar Spread	S	Simultaneous buy and sell orders for the same commodity with different delivery months.
Condor	C	Simultaneous buy/sell order for one contract in the near delivery month, sell/buy order for one contract in a future delivery month, sell/buy order for one contract in a subsequent future delivery month, and buy/sell order for one contract with an even later expiration. The gaps between the months must be equal.
Pack	P	An order for a group of contracts for the same commodity in four consecutive quarterly or consecutive months. The first month of the "White Pack" is configurable and can be any month of the next four quarterly months, although it's usually the next. The number of lots in each leg must be the same. LIFFE CONNECT® and CME Globex® currently recognize five Packs: White Pack /Red Pack /Green Pack /Blue Pack/Gold Pack.
Reduced Tick Calendar Spread	R	This version of the calendar spread has a smaller minimum tick size movement than that available in other strategies or outright markets.
Reverse Spread	W	Simultaneous buy and sell orders for the same commodity with different delivery months, but the buy and sell sides are reversed from a standard calendar spread.

3 Identify the strategy leg gap

Calendar Butterfly Condor Reduced Tick Calendar Reverse	Distance between strategy legs calculated in number of months that can be listed.
Pack	Number of the pack starting from the nearest to expiration: 1 for White, 2 for Red, 3 for Green, 4 for Blue, 5 for Gold.
Bundle	Number of legs: 2–8 legs (2 years), 3–12 legs (3 years), 4–16 legs (4 years), 5–20 legs (5 years).

CQG supports orders with fixed leg gaps, i.e. the gap between two consecutive legs are the same for multi-legged strategies.

4 Identify the delivery month and year

Month Suffix

F	January	G	February	H	March	J	April	K	May	M	June
N	July	Q	August	U	September	V	October	X	November	Z	December

5 Follow the formula

Calendar Spread	symbol root + S + strategy leg gap + month + year
	strategy leg gap = 1, 2, 3, 4, 5, 6, or 12 or by demand
	If every month is tradable, such as CLE and EDA, then the leg gap is equal to calendar months, for example, January to February is 1 and February to July is 6.
	Some commodities trade in irregular increments. Corn allows H, K, N, U, and Z. Cotton allows H, K, N, V, and Z. The leg gap indicates the spacing of these listed months.
	Crude Oil: CLES3N9 (represents CLEN9-CLEV9) Sugar: SBES3K10 (represents SBEK9-SBEF10)
Reduced Tick Calendar Spread	symbol root + R + strategy leg gap + month + year
	strategy leg gap = 1, 2, 3, 4, 5, 6, or 12 or by demand
	TYAR1Z9 (represents TYAZ9-TYAH0)
Reverse Spread	symbol root + W + strategy leg gap + month + year
	strategy leg gap = 1, 2, 3, 4
	Swiss Franc: Sell SF6W1U9 (represents buy SF6U9 and sell SF6Z9)
Butterfly Spread	symbol root + L + interval + month + year
	interval = usually 1, 2, or 3
	A Eurodollar butterfly spread, quoted in .50 tick increments, is a combination of two calendar spreads: Buy 1 = Leg # 1 Sell 2 = Leg # 2 Buy 1 = Leg # 3 EDAL3M9 represents EDAM9 - 2*EDAU9 + EDAZ9
Pack	symbol root + P + number of the pack + month + year
	number of the pack = 1 – 10 by demand, represents number of years with this year equal to 1
	Eurodollar: EDAP1M9 (represents EDAM9 + EDAU9 + EDAZ9 + EDAH10) Eurodollar: EDAP2Z9 (represents EDAZ9 + EDAH10 + EDAM10 + EDAU10)
Bundle	symbol root + B + number of years + month + year
	number of years = 2, 3, 4, or 5, there are 4 legs per year [for Eurodollar]. B2 would have 8 legs and B3 would have 12 legs)
	EDAB2M9 represents EDAM9 + EDAU9 + EDAZ9 + EDAH10 + EDAM10 + EDAU10 + EDAZ10 + EDAH11
Condor	symbol root + C + interval + month + year
	interval = usually 1, 2, or 3
	A Eurodollar condor spread, quoted in .50 tick increments, is a combination of two calendar spreads: Buy 1 = Leg # 1, Sell 1 = Leg # 2, Sell 1 = Leg # 3, Buy 1 = Leg # 4 EDAC3M9 (represents EDAM9 – EDAU9 – EDAZ9 + EDAH0)
